

To whom it may concern,

City Gates Ministries operates on 100% volunteer status and is dependent on its volunteers. It is extremely important to our organization to know we can fully depend on the volunteers and the work our volunteers commit themselves to do.

Media is the most important asset to a nonprofit organization. City Gates was at a standstill with outdated logos, letterhead and web design graphics that are critical to our success. After meeting Kendra at an auction meeting where she offered her volunteer support to do the graphics for our yearly Fall Harvest Auction, We were amazed at the skills she brought to the table and the proficiency she was able to offer. The graphics Parachute Technology put together were astonishingly professional.

In addition; after researching the ministry and the depth of what CGM does, Kendra went above and beyond making herself available to serve in other vital areas of the ministry. She worked diligently to set up a new graphic design to complement our needs and extended her talents to redesign business cards, envelopes, letterhead, banners, and is even helping to expand our web page profile and Face book network. Combined with her volunteer time to ensure the auction is a success, we cannot measure the value Parachute Technology has brought to our organization in such a short time.

Kendra is a natural leader and will accomplish anything she sets her mind to do. She shows compassion for others and cares deeply for her community. She does not wait for things to happen, she develops and makes things happen. We would encourage any organization that is struggling to be recognized to entertain the professional services Parachute Technology has to offer.

Regards,

Phil Prietto
